New eBook: *Green Inversion*

Synopsis - Project Green Inversions.

Based on the very creative intense hands-on workshop with German theatre artists les dramaturx in Skopje and online workshop in collaboration with Macedonian authors and playwrights; with focus on green dramaturgy - we created 12 short plays who are narrating various issues based on climate change - humans in the situation based on lack of food and water / humans in the situation based on polluting the country with toxic waste for money / humans in situation being attacked by the mountain bears ... with tons of surrealism, realism, absurd ... and we created a dramatic map based on green problems that yearns to be staged as performances. Probably in the year 2025.
